                                                                                    it(blockID: u32): u32
```

Methods colored in ma

ta are virtual, while methods colored in violet are abstract. Methods and attributes colored in orange will change. Blue coloring means "static".

(!) means that the return value shall not be ignored. "u8", "u16", "u32", "u64", "i8", "i16", "i32" and "i64" are abbreviations of integer types in the C standard.
